Highlights

- o Advanced skills in programming, machine learning, and geospatial tools for large-scale applications.
- o Strong knowledge of remote sensing datasets and algorithms.
- o Practical experience working with multi-disciplinary teams and handling diverse tasks.

Education

University of Maryland <i>Ph.D. Geographical Sciences</i>	College Park, MD 2011–2017
Institute of Electronics, Chinese Academy of Sciences <i>M.E. Signal and Information Processing</i>	Beijing, China 2008–2011
University of Science and Technology of China <i>B.E. Electronic Engineering, Special Class for the Gifted Young</i>	Hefei, China 2003–2008

Ph.D. Dissertation

title: *Towards Fine Scale Characterization of Global Urban Extent, Change and Structure*

advisor: Dr. Chengquan Huang

description: Based on innovative data processing and information extraction techniques, this dissertation seeks to fill in several fundamental knowledge gaps in urban science by advancing the fine scale characterization of global urban extent, change, and structure using satellite datasets.

Experience

Research.....

University of Maryland <i>Graduate Research Assistant</i>	College Park 2012–2017
---	----------------------------------

Supported various remote sensing projects, including:

- o Global Land Survey Impervious Mapping Project (<https://urban.gsfc.nasa.gov>):
 - Designed a global urban extent mapping algorithms using Landsat data;
 - Produced a 30m global Human Built-up and Settlement Extent (HBASE) product;
 - Developed computer programs for global-scale Landsat imagery processing;
 - Led validation efforts for global HBASE product and impervious surface change.
- o VIIRS Surface Type Project (<http://vct.geog.umd.edu/st>):
 - Developed and implemented an algorithm for automatic training data generation from high resolution imagery to map continuous fields land cover;
 - Supported VIIRS surface type product development and validation;
 - Prototyped VIIRS daily burnt area mapping;
 - Prototyped VIIRS daily inundation validation method using Sentinel-1 SAR data.

Institute of Electronics

Graduate Research Assistant

Developed and implemented a relative calibration platform and data processing systems.

Beijing

2009–2011

Teaching.....

University of Maryland

Teaching Assistant

Lab instructor for two remote sensing courses.

College Park

2011–2012

Skills

Programming Languages: C/C++ (10+ yr), Python (8+ yr), IDL (8+ yr), Java (basic)

Datasets: Landsat (8+ yr), MODIS (8+ yr), VIIRS (5+ yr), Sentinel-1/2 (1+ yr)

Geospatial Tools: ENVI (8+ yr), ArcGIS (6+ yr), QGIS (5+ yr), GDAL (5+ yr)

Others: Linux (8+ yr), GIT (2+ yr)

Awards

Jacob K. Goldhaber Travel Grant: University of Maryland

2015. 12

Jingli Yang Summer Research Fellowship: University of Maryland

2016. 04

Open Access Publishing Fund: University of Maryland

2017. 09

Jacob K. Goldhaber Travel: University of Maryland

2017. 10

Services

- o Reviewer for scientific journals including IEEE Transactions on Geoscience and Remote Sensing, International Journal of Remote Sensing, Urban Science, Remote Sensing Applications: Society and Environment
- o Co-chair for 2017 IGARSS session TU1.L12: Radar and Thermal Data for Urban Monitoring
- o Undergraduate student mentor for college of Behavioral and Social Sciences (Fall 2013)
